

# TRAINING IN INFECTION CONTROL IN EUROPE Denmark Udine, 21–22 June 2010 Jette Holt, Elsebeth Tvenstrup Jensen National Center of Infection Control

#### PROFILE

- 27 mergers of acute hospitals (2009) placed on 72 single hospitals 15,600 somatic beds and 348 ICU beds (2007)
- 13,856 doctors, 33,471 nurses and 24,500 others employed in acute hospitals (2009)
- The Danish model is characterised by tax-based financing and large-scale public production of hospital services
- Infection Control (IC) and Risk Management Systems are seperate bodies. The IC component of Patient Safety is based on national recommandations. Collaboration on campaigns can be improved
- Population (2009) 5,515,287. GPD 233.2 billion € (2008). Health care expenditure totals 9.8 % of GDP in 2007=22.85 billion € (2008), Pr capita 4144 €.
- Hospital expenditure totals 4.3 % of GDP= 10.03 billion € (2007). Per capita 1818 €
  National recommendations on Infection Control since 1977
- National Board of Health is officially/legally responsible for IC activities at national level. The 5 Regions are responsible at regional level and hospital management at local level. National Center of IC has advisory function for National Board of Health

## **CURRENT SITUATION**

#### INFECTION CONTROL RESOURCE CAPACITY IN ACUTE HOSPITALS (RECOMMENDED TOPICS):

- Professional ressources: 57 full time IC nurses (2 in National Center of IC, 2 in short term employment in primary healthcare), 5 full time ICD (2 in National Center of IC), min 14 working part time with IC
- Professionals' background: <u>27 nurses</u> hold IC Specialist education in IC (45 ECTS), 7 have Diploma in IC from NHV (60 ECTS), 13 others are students at Diploma at NHV and 3 are planning to start Diploma in IC at NHV
  <u>3 doctors</u> (clinical microbiologist) have started Diploma in IC at NHV, the rest have Clinical microbiologist background and some epidemiology
- No recommended ratios- but the ratio of ICN is 1/300 beds
- Infection control is organized in Infection Control Committees, and/or Infection Control Teams. Advisory body to hospital board. Each IC professional has a job description for IC activities.
- Some hospitals have link professionals at the wards mostly nurses. They refer to the IC Team

## EXISTING TRAINING CAPACITY

#### INFECTION CONTROL TRAINING (RECOMMENDED TOPICS):

- Bachelor of Science in Nursing (B.N.), 210 ECTS, (2008),
- To be a IC Nurse or IC doctor the Nordic Diploma Program at NHV (Nordic School of Public Health, Gotenburg, Sweden) in IC (60 ECTS) or similar is recommended
- Since 2007 IC education has been continuously in place at NHV with nordic curriculum
- The competent bodies organizing Nordic Diploma IC training are Statens Serum Institut (DK), Folkehelseinstituttet (N) and Smittskyddsinstitutet (S)
- The IC training at NHV is based on "IPSE European core curriculum for training for infection control practitioner" and the competencies are considered and incorporated in the Diploma courses

## MAIN OBSTACLES FOR IMPROVING INFECTION CONTROL PROFESSIONALS TRAINING

- 1. Lack of political will to create the positions in hospitals and escpecially primary health care due to economy and minimum surveillance
- 2. Ongoing implementation for the Danish Healthcare Qality Programme
- 3. Too little Infection Control Training in basic education for professional HCW

#### THE FUTURE

PLANS FOR FURTHER ORGANISATION OF INFECTION CONTROL TRAINING IN THEIR COUNTRY:

- Topics to be prioritized for training: 1) training in basic education, 2) training of primary sector professionals
- Future national perspectives in this area: will be based on decisions made on strategy meeting for National Center of IC and IC professionals on June 21st 2010
