

NORDICARE OVERFLADEDESINFEKTION 85% Alkohol

The company NGL NORDIC A/S has requested an evaluation of the product NORDICARE OVERFLADEDESINFEKTION 85% Alkohol by National Center for Infection Control (CEI). NORDICARE OVERFLADEDESINFEKTION 85% Alkohol is in a liquid form intended for surface disinfection of smaller visibly clean and dry surfaces on non-critical equipment, inventory and contact points which is compatible to alcohol.

The active substance in the product is primarily denatured ethanol. The total alcohol content is approx. 85 (v/v%). The content of isopropanol (2-propanol) is less than 1/10 of the total alcohol concentration.

Conclusion

CEI concludes that NORDICARE OVERFLADEDESINFEKTION 85% Alkohol fulfills the requirements described in the National Infection Control and Prevention Guidelines (NIR) for disinfection in Danish health care.

CEI finds the product NORDICARE OVERFLADEDESINFEKTION 85% Alkohol suitable for surface disinfection of smaller visibly clean and dry surfaces on non-critical equipment, furniture or contact points in Danish health care.
